After All, It's Our Money!

The Problem

- The US government is spending nearly \$3.0 trillion to stabilize and stimulate the economy, yet on average 20,000 jobs have been lost EACH DAY for the last 6-months! The government's plan is not working.

The Solution: The SUN Program

- **Every American Citizen and permanent resident 18-yrs and older will get a \$3,000 pre-paid credit card.**
- The credit card must be spent within the US or one of its territories.
- The credit card will expire 6-months after issuance to spur fast spending to stimulate the economy.

Why the SUN Program Will Work!

- Consumer spending is 70% of our economy. Put it in OUR hands, after all it's OUR money!
- There should be no extra cost to the government, just a re-direction of where they put the money. Instead of giving it to failed banks, insurance companies, car companies, pork projects, and slowly unfolding infrastructure projects, the money needs be put in the hands of the consumer to DIRECTLY stimulate the economy NOW.
- This massive spending will create millions of jobs NOW as businesses scramble to service customers and rebuild depleted inventories to meet orders.
- Businesses will become profitable again, sending stocks higher on Wall Street NOW.
- Consumer confidence will grow NOW, setting the stage for normal spending patterns to emerge after 6-months to sustain the economy in the future.
